Question for written answer E-001471/2024
to the Commission
Rule 144
Erik Marquardt (Verts/ALE)

Subject: Implementation of the Sustainable Development Goals

At the end of this term, we will have almost reached the year 2030. This means that there is not much time left to achieve the Sustainable Development Goals (SDGs) towards which the EU has committed to contribute. However, according to the United Nations, only 15 % of the SDGs are on track to be implemented by 2030. The first EU Voluntary Review on the Implementation of the 2030 Agenda provided an important overview of the EU's contribution. In light of the above:

1. What measures have been planned so that the 2030 Agenda can still be achieved, also considering the reduced development cooperation funding following the mid-term review of the Multiannual Financial Framework?

2. What steps have been taken so far in response to the implementation report's recommendations?

3. What is the Commission's view of the role of key actors, such as China, in the global implementation of the SDGs?
