

**Question for written answer E-001705/2024
to the Commission**
Rule 144
Ana Miranda Paz (Verts/ALE)

Subject: Trans-European Transport Network and new coordinator's calendar of activities

The Trans-European Transport Network includes the Atlantic corridor as a strategic corridor for the economic development and population fixation in my constituency, Galicia. Given this corridor's strategic importance for the Euroregion and in linking the north-west of the peninsula with the rest of the Union and in view of both the continuous delays and its planned completion date of 2026, we at the BNG would like to stress how late this is.

In view of this:

1. Does the Commission plan to do anything to encourage the coordinator of the Atlantic corridor to submit the annual report and state of play regarding the Atlantic corridor to Galicia, as well as the guidelines for the preparation of the future work plan, already in 2024?
2. What are the planned deadlines up to 19 July 2026 to ensure – in addition to the participation of the relevant stakeholders such as the local authorities and the business community – compliance with the timetable proposed in Decision (EU) 2024/2383, with a view to avoid isolating the Galician nation yet again from the rest of Europe in terms of infrastructure, logistics and its economy?
