

Question for written answer E-002581/2025
to the Commission
Rule 144
Barbara Bonte (PfE)

Subject: Proportion of college and university students focusing on STEM subjects

The proportion of college and university students choosing STEM subjects is a good indicator of future innovativeness.

1. How has this proportion evolved in the EU in recent years?
2. How does the EU compare to its biggest economic rivals, namely China and the United States, in this respect?
3. How does the Commission explain this evolution?
