

**Question for written answer E-003124/2025
to the Commission**
Rule 144
Gerald Hauser (PfE)

Subject: EU bodies in the health field (authorities, agencies, commissions)

The European Union is taking on more and more responsibilities in the field of health and is planning a substantial budget for the next seven years. Member States' health systems, meanwhile, are facing a deep crisis: forecasts suggest there will be a shortfall of roughly 4.1 million doctors, nurses and midwives by 2030.

There is a growing number of EU bodies working directly or indirectly in the field of health, including the European Health and Digital Executive Agency (HaDEA), the European Medicines Agency (EMA), the European Agency for Safety and Health at Work (EU-OSHA), the European Centre for Disease Prevention and Control (ECDC), the Health Emergency Preparedness and Response Authority (HERA), and initiatives connected to the European health union.

1. Which EU bodies are directly or indirectly involved in the health sector? Please provide a full list, including Commissioners' offices, Directorates-General, agencies, authorities, commissions, committees, etc.
2. How many employees does each of these bodies have, and what were their annual budgets for 2020-2025? Please provide a full list and a breakdown of the amounts involved.
3. Which non-governmental organisations, foundations or international organisations (e.g. WHO, WEF) received funding from these EU bodies in relation to health projects/activities in 2020-2025? Please provide a full list and a breakdown of the amounts involved.
