

**Question for written answer E-003743/2025
to the Commission**

Rule 144

Michael Bloss (Verts/ALE), Anna Cavazzini (Verts/ALE), Jutta Paulus (Verts/ALE), Hannah Neumann (Verts/ALE), Daniel Freund (Verts/ALE), Bas Eickhout (Verts/ALE), Benedetta Scuderi (Verts/ALE), Sergey Lagodinsky (Verts/ALE), Katrin Langensiepen (Verts/ALE), Catarina Vieira (Verts/ALE), Sara Matthieu (Verts/ALE), Maria Ohisalo (Verts/ALE), Erik Marquardt (Verts/ALE), Majdouline Sbai (Verts/ALE), Pär Holmgren (Verts/ALE), Marie Toussaint (Verts/ALE), Alice Kuhnke (Verts/ALE), Isabella Lövin (Verts/ALE)

Subject: Energy dimension of the EU-US trade deal

In the light of the recently concluded trade agreement between US President Donald Trump and Commission President Ursula von der Leyen, we request clarification regarding how purchases of US liquefied natural gas, oil and nuclear energy products and technologies amounting to USD 750 billion by 2028, as laid out in the Framework Agreement of 21 August 2025, are to be implemented.

Can the Commission provide information on:

1. the legal and contractual framework governing the energy purchases between the EU and the United States, specifying the planned procedures to facilitate these purchases and clarifying the potential roles of the EU energy and raw materials platform and the Member States in the process?
2. the projected impact of these purchases on the EU's overall greenhouse gas emissions?
3. how the Commission will ensure that these purchases align with the objectives of the European Green Deal, notably the EU's greenhouse gas emission reduction and renewable energy targets?
