

**Question for written answer E-003778/2025
to the Commission**

Rule 144

Isabel Benjumea Benjumea (PPE)

Subject: Recovery and Resilience Facility in Spain – question four

The Spanish Government is refusing to publish the final implementation data for the NextGenerationEU Recovery and Resilience Facility, i.e. the money that should have reached the final recipients. The constant requests for this information from the European Court of Auditors, the European Parliament, the various political groups and independent bodies and entities have been ignored.

The only data provided by the government through the General Intervention of the State Administration (IGAE) concerns payments made, which indicates that as of 31 July 2025, payments amounting to EUR 43.208 billion have been made. This would represent 26.3 % of the funds allocated to Spain.

In light of the above, can the Commission say:

1. Has the Spanish Government provided the European Commission with the final implementation data for the Recovery and Resilience Facility?
2. If not, does the Commission have any estimates of the final implementation of these EU funds in Spain and their real impact on the Spanish economy?
3. Which countries have submitted their final implementation data for the Recovery and Resilience Facility to the Commission?
