to the Commission**  
Rule 144  
**Pierre Juvet (S&D)**

**Subject:** Bias and fascist digressions of chatbot Grok: need for Commission to take action in light of the requirements of the Digital Services Act

Since its update in July 2025, the conversational chatbot Grok – part of the social network X – has made news for its pro-Nazi, supremacist and discriminatory remarks.

This seems clearly incompatible with the requirements set out in Articles 34 and 35 of the Digital Services Act (DSA), which oblige online platforms to examine ‘whether and how [...] the design of [...] any [...] relevant algorithmic system’ influences ‘the exercise of fundamental rights, in particular [...] freedom of expression and information, [...] non-discrimination [and] the rights of the child’, and to assess their impact on ‘civic discourse and electoral processes, and public security’.

Together with Thierry Sothier, elected member of the National Assembly for Bas-Rhin’s 3rd constituency, we referred the matter to Arcom, the authority responsible for regulating digital services in France, for proceedings to be initiated. Arcom has forwarded our referral to the Commission.

1. Since 2023, what progress has the Commission made in its investigation into possible infringements of the DSA by X (formerly Twitter)?
2. Will it launch a new specific investigation into Grok?
3. Will it open formal compliance or penalty proceedings against xAI?
