

**Question for written answer E-004091/2025
to the Commission**
Rule 144
Vicent Marzà Ibáñez (Verts/ALE)

Subject: Withdrawal of EU funding for the Benasque-Benás cable car

By means of judgment No 000086/2025, Administrative Court No 1 of Huesca annulled Benasque Town Council's decision to install a cable car between Benasque and the Cerler-Sarllè ski resort because it breaches the Public Hydraulic Domain Regulation by placing its base station and car park in the River Ésera's floodplain – a decision that disregards an unfavourable report from the Ebro Hydrographic Confederation, because no economic feasibility study was carried out and because shortcomings were found in the geotechnical reports. What is more, the work that has already been done has damaged Mosquera fir forest, an area of high ecological and landscape value. Given that this project has received NextGenerationEU funding via the Government of Aragón's Pyrenees Plan and in the light of the serious irregularities reported, which have now been recognised by the courts:

Will the Commission withdraw EU funding for this project and demand that the funds that have already been disbursed be reimbursed?
