

**Question for written answer E-004535/2025
to the Commission**
Rule 144
Moritz Körner (Renew)

Subject: Energy consumption

1. According to the Commission's estimates, compared with current levels, how much will energy consumption in the EU have increased by 2050 as a result of bitcoin mining and AI computing power? Please provide this information in percentage terms and in absolute figures.
2. What impact will the expected development have on the EU's 2050 climate targets?
3. If the Commission cannot answer these questions, why not?
