

**Question for written answer E-004772/2025
to the Commission**
Rule 144
Nikos Pappas (The Left)

Subject: Ensuring equal access for children with disabilities to education, school infrastructure, transport and sport activities

Regulation (EU) 2021/817 (Articles 3 and 15), the EU Charter of Fundamental Rights (Articles 21 and 26) and the strategy for the rights of persons with disabilities 2021-2030 require Member States to ensure equality, accessibility and inclusiveness with regard to the participation of students with disabilities in education, school services, transport and sport activities.

Despite these legal obligations, recent reports show that significant shortcomings persist in Greece in relation to accessible school infrastructure and specialised staff, as well as to the safe transport of students with disabilities and their systematic inclusion in sports activities. These findings raise legitimate concerns as to the full implementation of EU requirements.

The Commission is asked:

1. How does it assess Greece's level of compliance with Articles 21 and 26 of the Charter and with Regulation (EU) 2021/817, in particular as regards the accessibility of school infrastructure and the transport and participation of students with disabilities in school and sports activities?
2. What is the timeline for the implementation of the EU strategy for the rights of persons with disabilities 2021-2030, and with what tools will the Commission support Member States in ensuring adequate infrastructure and specialised staff, in line with the regulation and the Charter?
3. To what extent can the Commission support Greece in developing systematic mechanisms to monitor and improve accessibility for students with disabilities?
