

Question for written answer E-004799/2025
to the Commission
Rule 144
César Luena (S&D)

Subject: Investigation into the possible misuse of European funds intended for sustainable mobility in Logroño (La Rioja)

Following the Commission's answer to question E-000244/2024 on the removal of EU-funded cycle lanes in Logroño, doubts remain as to the proper use of investments linked to the Recovery and Resilience Facility (RRF) in this city.

Component 1 of the Spanish recovery plan provides for investments to promote sustainable mobility and reduce urban emissions, objectives which could be compromised by local decisions reversing actions financed by European funds.

Furthermore, consideration of the petition submitted to the European Parliament's Committee on Petitions on this matter is at a standstill owing to its obstruction by the EPP and the extreme right, despite the concerns of local sustainable mobility and environmental protection groups.

In light of the above:

1. Is the Commission examining whether the decisions of Logroño City Council are compatible with the milestones and targets of component 1 of the Spanish RRF?
2. Can the Commission confirm whether it monitors the impact of this type of action on the achievement of sustainable urban mobility objectives in Spain, especially in projects co-financed with NextGenerationEU funds?
3. In the event that a deviation from the objectives of the approved projects were to be detected, what corrective measures could the Commission apply?
