**Subject:** EU funding and media campaigns undermining regional policies promoting motherhood

The article ‘S-INFO: how anti-abortion associations use public funds to expand in Piedmont’s healthcare sector’, published on the website of the S-INFO project<sup>1</sup> and picked up by media outlets such as Global Project<sup>2</sup>, gives a distorted and disparaging account of the work of third-sector groups to support motherhood.

According to the site, this investigation is part of a project cofinanced by the European Education and Culture Executive Agency (EACEA).

The ‘Vita nascente’ fund in the Region of Piedmont, established by Article 19 of Regional Law 6/2022, finances social welfare measures to promote motherhood under regional competences.

It is therefore a serious matter that EU funds are being used to support a media initiative that not only undermines activities recognised under regional law, but also discredits institutional action by the Region of Piedmont, disrupting the appropriate balance between the European Union and regional autonomy.

In view of this:

1. Can the Commission confirm that this project receives funding from the EACEA?
2. Does it consider that the use of EU funds for initiatives that attack legitimately adopted regional policies is compatible with the principles of impartiality, pluralism and respect for institutional competences?
3. How will it strengthen its oversight to ensure that European resources are not used for campaigns that discredit institutions?
