

**Question for written answer E-002983/2026
to the Commission**
Rule 144
Moritz Körner (Renew)

Subject: UAP allegations

In a June 2023 NewsNation interview, then US Senator Marco Rubio said that several current or former government personnel had approached the US Senate Intelligence Committee with what he called ‘firsthand knowledge or firsthand claims’ concerning matters related to unidentified anomalous phenomena (UAP). He added that many had held high-level security clearances and senior government positions. The current US Government has been regularly releasing tranches of documents on this issue.

1. Has the Commission verified the documents and the statements of its US counterparts on this issue?
2. Does the Commission consider the publications of the US administration to be at all serious?
3. Does the Commission rule out the existence of UAP/UFOs?
