

Priority question for written answer P-002028/2026
to the Vice-President of the Commission / High Representative of the Union for Foreign Affairs and Security Policy
Rule 144
Kostas Papadakis (NI)

Subject: The dangerous incident of the Ukrainian floating drone found in Lefkada

The New Democracy Government, after days of silence, has admitted that the floating drone found in Lefkada loaded with a large amount of explosives is Ukrainian. Greece is a proven point of departure and target for military operations from land and sea, located at the point where two fronts of the imperialist war converge.

The EU has given more than EUR 194 billion to ‘support’ Ukraine, it has trained 84 000 soldiers and officers of the Ukrainian army, while Ukraine also participates in the SAFE programme. A few days ago, the EU even created a war compensation mechanism for Ukraine in order for EU business groups to cash in on the ‘reconstruction’.

The people, due to war-related price increases in energy, fuel and food, see their salaries disappear in the middle of the month, while the EU and governments finance and support the Ukrainian Government, adding fuel to the fire of war.

In view of the above:

1. What is the position of the Vice-President / High Representative of the Union for Foreign Affairs and Security Policy on the dangerous role of the Zelensky regime - financed from all sides by the EU and governments, whose drone was sent to Lefkada loaded with explosives and only by chance did not have fatal or other dangerous consequences?
2. What is the position of the Vice-President / High Representative of the Union for Foreign Affairs and Security Policy on the request to stop forthwith the European Union's economic, political and military support for Ukraine, which is proving to be a source of danger to the security of the people of Europe and of the war expanding into the wider region?
