E-002897/2024

Answer given by Mr Jørgensen
on behalf of the European Commission
(7.3.2025)

The Transmission System Operators are currently working on a pan-European Bidding Zone Review and the report is expected early in 2025. Once the report is finalised, it will be sent to all Member States who must take a decision within 6 months on how to address the congestion identified in line with Article 14(7) of the Electricity Regulation (EU) 2019/943¹. The Commission is following this process closely and will work with the Member States to ensure that the Electricity Regulation is well-implemented.

The Commission's role in deciding on a bidding zone reconfiguration is determined by a precise set of circumstances as set out in Article 14(8) of the Electricity Regulation.
