Subject: Competitive impacts of Regulation EU 2023/1115 on European producers of latex balloons

Regulation (EU) 2023/1115 ⁽¹⁾ imposes traceability, registration and verification obligations on all operators placing on the market raw materials listed in Annex I, including natural rubber latex (customs code 4001), which is used by European producers of latex balloons.

Although they contain the same raw material (customs code 9503), finished latex balloons are not included in Annex I and are not subject to the same obligations, thus favouring non-EU producers who export these items to Europe without bureaucratic burdens.

This regulatory disparity distorts competition, placing European producers at a disadvantage, subject to higher costs and obligations, and incentivising the import of finished products from countries not subject to the same environmental standards.

Article 34 of the regulation provides for a revision of Annex I, with the possibility of including products made from relevant raw materials, in order to avoid market imbalances and ensure the effectiveness of the standard.

We ask the Commission:

1. when the impact assessment provided for in Article 34(3) of the regulation will be available, and whether it will also include finished products, such as latex balloons (CN code 9503), among those subject to the obligations;
2. whether it intends to adopt corrective measures, including through delegated acts, to ensure a level playing field between European and non-European producers?

Submitted: 27.5.2025

Answer given by Ms Roswall on behalf of the European Commission
(26 August 2025)

The Commission is committed to implementing EU rules on deforestation in a spirit of close partnership, transparency, and open dialogue. Its aim is to reduce administrative burden for companies while preserving the goals of the EU Deforestation Regulation (EUDR) ⁽¹⁾.

The Commission will continue to work very closely with all stakeholders, to ensure that EU rules deliver on reducing global deforestation and forest degradation in the least burdensome way for companies that should not jeopardise EU competitiveness.

On 15 April 2025, the Commission published a package ⁽²⁾ of measures ensuring further simplifications and reducing the administrative burden to facilitate the implementation of the EUDR. The package included a draft Delegated Act to provide further clarifications and simplification on the product scope of EUDR.

The draft Delegated Act has been subject to the mandatory 4-week public feedback. The Commission is currently reviewing relevant contributions received from stakeholders, including those provided by the latex balloons sector.
