**Question for written answer E-002398/25
to the Commission
Piotr Müller (ECR)
(13 June 2025)**

Subject: Public support for the construction of Poland's first nuclear power plant

Poland has been waiting for months for the Commission to take a decision on state aid for the country's first nuclear power plant. The plant in the municipality of Choczewo, Pomerania, is one of the most important energy investments being planned in Poland, with the aim of providing a stable, zero-emission source of electricity for the whole country.

I would therefore like to ask three specific questions, which require equally specific answers:

1. What is the state of play with regard to the Commission's work on issuing a decision on state aid for the first nuclear power plant in Poland?
2. Has the Polish Government raised this issue with the Commission during the Polish Presidency, i.e. since 1 January 2025? If so, what responses has it received from the Commission?
3. Have meetings on this matter taken place between Polish Government ministers and European Commissioners over the last six months?

Submitted: 13.6.2025

**Answer given by Executive Vice-President Ribera on behalf of the European Commission
(25 July 2025)**

The Commission is in close and constructive contacts with the Polish authorities concerning this state aid case. The Commission is fully conscious of the significance this project has for Poland and treats this case with a high priority.

On 18 December 2024, the Commission adopted a decision initiating the formal investigation procedure concerning the aid package supporting the first nuclear power plant, as notified by Poland.

This decision was published in the Official Journal on 4 March 2025 ⁽¹⁾, inviting interested parties to submit comments within one month of that date. These comments were forwarded to Poland to provide its replies to the submitted comments. Poland submitted its replies to the Commission.

In view of the ongoing procedure, the Commission is neither in a position to comment further on the content of the contacts with the Polish authorities, nor can it predict the timing or outcome.
