E-003137/2025

Answer given by High Representative/Vice-President Kallas
on behalf of the European Commission
(26.9.2025)

The European Union Integrated Border Management Assistance Mission in Libya (EUBAM Libya) is active in the context of border surveillance between Tunisia and Libya in Ras Ajdir border crossing Al Assah operations centre and Abu Sharaf guard tower. EUBAM Libya has supplied and installed a high frequency radio base station, data network cables, desktop computers, printers, closed-circuit television, access control devices, photo-voltaic panels, inverters and batteries to Al Assah operations room.

EUBAM has provided an office container, a high frequency radio base station, closed-circuit television, photo-voltaic panels, inverters and batteries to Abu Sharaf watchtower.

The Mission has provided and installed photo-voltaic panels at Ras Ajdir border crossing point, ensuring business continuity and reducing the long waits of customers in transit.

EUBAM is supporting the Libyan intra and inter agency cooperation in order to increase effectiveness of the border management. Consequently, the Mission has no engagement with the Tunisian authorities. The cooperation should be strengthened with the Border Guard Agency, General Administration of Anti-Narcotics, the Criminal Investigation Directorate, the Tourism Police, the General Administration for Security Operations, the Office for Arab and International Criminal Police of the Ministry of Interior, the Libyan Coast Guard and Port Security, the Libyan Border Guards of the Ministry of Defence, the Libyan Customs Authority (LCA) and the European Union Affairs Department of the Ministry of Foreign Affairs as intermediary.

EUBAM Libya is providing customs management software to the LCA, essential to launch the Automated System for Customs Data (ASYCUDA).
