E-004110/2025

Answer given by Mr Síkela
on behalf of the European Commission
(26.1.2026)

The Commission is committed to ensuring transparency and accountability in delivering the Global Gateway strategy.

Global Gateway investment mobilisation has reached EUR 306 billion through coordinated action from the EU, its Member States and their development financial institutions, the European Investment Bank (EIB), and the European Bank for Reconstruction and Development (EBRD). EU funding is primarily drawn from the Neighbourhood, Development and International Cooperation Instrument (NDICI)-Global Europe and the Instrument for Pre-Accession Assistance III, implemented mainly via the European Fund for Sustainable Development Plus (EFSD+). Funds for Global Gateway are also drawn from the Ukraine Investment Framework (UIF).

For Team Europe contributions, the Commission applies a dedicated methodology to avoid double reporting between the EU, EIB and EBRD and national instruments. A common tracking system distinguishes investments supported by the EU budget from those provided by wider Team Europe actors and maps them across global regions. For investments not supported by the EU, the responsibility for reporting lies with the relevant Member States, EIB and EBRD. A breakdown by type of actor is in the annex.

Most actions financed by the EU follow NDICI–Global Europe governance rules and are adopted through comitology and EFSD+ procedures. In addition, support to Global Gateway is provided under the UIF, which contributes to country-specific objectives in Ukraine and is governed by the Ukraine Facility Regulation¹.

A comprehensive reporting of investments mobilised through Global Gateway, which provides an up-to-date overview of aggregated and regional categorisation of amounts mobilised, is publicly available online².
