EN
E-004979/2025
Answer given by Mr Dombrovskis
on behalf of the European Commission
(7.5.2026)

The written question refers to two targets related to Ministerial Decree N. 77/2022, specifically M6C1-3, concerning 1 038 health community houses, and M6C1-11, concerning 307 community hospitals[1]. The Commission will assess the fulfilment of these two targets against the requirements enshrined in the Council Implementing Decision (CID) Annex[2] in the context of the tenth payment request, which is expected to be submitted by Italy to the Commission later in 2026 (at the latest by 31 August 2026 in line with the Recovery and Resilience Facility Regulation[3]).

The Commission is in constant dialogue with the Italian Authorities on the implementation of the Italian recovery and resilience plan, with frequent technical meetings including on the abovementioned measures.

The Commission understands that the statistics referred to in the written question reflect data from the first semester of 2025. Furthermore, the Commission understands that the data at stake refer to the total number of structures planned including structures that are to be financed by national funds, hence outside the scope and timeframe of the Recovery and Resilience Facility.

The Commission will assess whether the relevant milestones and targets in the CID Annex have been satisfactorily fulfilled following the submission of a properly justified payment request by Italy.

[1] The written question also refers to the Territorial Coordination Centres *(*Centrali Operative Territoriali*),* which were already assessed in the context of the 7th payment request, in relation to target M6C1-7.
