E-000340/2026
Answer given by Mr McGrath
on behalf of the European Commission
(17.3.2026)

NextGenerationEU is a temporary instrument (2021–2026) established to support the European Union’s economic recovery from the COVID-19 crisis and to emerge stronger and more resilient from it. It consists mainly of loans and grants provided to Member States through the Recovery and Resilience Facility. Information about the instrument, the recipient countries and the funded projects can be found on the NextGenerationEU web site¹, the Recovery and Resilience Facility page² and the Recovery and Resilience Scoreboard³.

Under the 2021–2027 Multiannual Financial Framework, funding is provided through EU programmes adopted by the European Parliament and the Council in accordance with the applicable legislative procedures. Depending on the implementation mode, EU programmes are implemented through Commission work programmes and open calls in direct management, or through national and regional programmes under shared management. All the information about the programmes, the work programmes, the calls for proposals, and their objectives are published on the Funding and Tender Portal⁴. Information about the funded projects, abstracts, achievements of the projects and deliverables are published on the same site.
