E-002558/2026

Answer given by Executive Vice-President Virkkunen
on behalf of the European Commission
(7.9.2026)

The Commission cooperates with Digital Services Coordinators (DSCs) in the framework of the European Board for Digital Services (the Board) Working Group on orders and criminal issues¹. DSCs use the AGORA² information-sharing platform, established under Article 85 of the Digital Services Act (DSA)³, to facilitate the transmission of orders received from national authorities to all other DSCs under Article 9(4) of the DSA. The Commission is also working to enhance the user experience of AGORA and to strengthen its interoperability with national IT systems, with the aim of facilitating more efficient information exchange.

The protection of fundamental rights is at the core of the DSA and of the related enforcement work. Most recently, the Board, in cooperation with the Commission, has published its second annual report on systemic risks under the DSA⁴, which identifies systemic risks, such as the spread of illegal content or threats to fundamental rights, occurring on very large online platforms and gives an overview of the mitigation measures taken by platforms to counter such risks.
