P-002319/2024

Answer given by Mr Hansen
on behalf of the European Commission
(19.12.2024)

1. Investment projects are not eligible for eco-schemes, as eco-schemes consist of payments to active farmers per hectare of land.

2. The project or part of it may be eligible for support from the Spanish Common Agricultural Policy Strategic Plan 2023-2027 under the following two interventions: Support for investments in processing/marketing and LEADER.

The LIFE programme supports projects aiming at achieving environmental and climate action objectives in line with related legislation and policies and seems not relevant for this project.

As concerns NextGenerationEU funding, the current Spanish Recovery and Resilience Plan does not envisage investments aligned with this project.

The European Regional Development Fund programme for Asturias 2021-2027 can support business investment projects in small and medium-sized enterprises¹.

3. The prohibition of double funding requires that the same costs are not financed twice by the EU budget. However, if cumulative funding is allowed for each of the EU funds concerned, different parts or costs of the same project can be financed by different EU funds.
