**Priority question for written answer P-000126/26
to the Commission
Christian Ehler (PPE)
(14 January 2026)**

Subject: Key performance indicators in the Clean Industrial Deal

On 26 February 2025, the Commission presented the Clean Industrial Deal as a follow-up to the European Green Deal. The Clean Industrial Deal includes multiple pillars and respective action plans, all of which are to be measured against the achievement of certain key performance indicators (KPIs), which are set for each pillar. Some of the KPIs include hard deadlines, some do not.

1. What internal processes and methodologies has the Commission set up to measure each individual KPI set out in the Clean Industrial Deal, and to follow up on progress regarding their achievement, including through potential additional necessary actions in cases where the KPIs are not expected to be achieved?
2. By when does the Commission expect to reach each of the KPIs for which no deadlines have been set (both KPIs on lead markets, the KPI on public and private investment and the KPI on skills)?
3. What progress has been made so far on each of the KPIs?

Submitted: 14.1.2026

**Answer given by Executive Vice-President Séjourné on behalf of the European Commission
(16 February 2026)**

The Commission is tracking the implementation of the Clean Industrial Deal ⁽¹⁾. The evolution of the key performance indicators (KPIs) and the achievement of related targets and objectives set out in the Clean Industrial Deal are monitored as part of the Annual Single Market and Competitiveness Report and the online Single Market and Competitiveness Scoreboard.

The Annual Single Market and Competitiveness Report informs policy discussions with the Council, the European Parliament and Member States, including on potential further actions necessary to reach Single Market and competitiveness objectives. All KPIs covered in the Clean Industrial Deal are taken up in this annual reporting process.

Furthermore, an overview of the implementation of the initiatives announced in the Clean Industrial Deal is given in the communication of 2 July 2025 on ‘Delivering on the Clean Industrial Deal I’ ⁽²⁾ and more recently, in Annex 2 of the Staff Working Document accompanying the 2026 edition of the Annual Single Market and Competitiveness Report ⁽³⁾.

The 2026 Annual Single Market and Competitiveness Report and the Scoreboard ⁽⁴⁾ include the latest state of play of each KPI of the Clean Industrial Deal.
